

Testing,

- Although we offer a full range of testing capabilities, we understand weldments and the requirements of the welding industry which means we can offer advice on how much testing you really need or can determine the root-cause of a failure—so you can get back to production.

Testing Services:

- ✓ Tensile/Compression
- ✓ Charpy
- ✓ Hardness
- ✓ Micro-Hardness
- ✓ Metallurgical
- ✓ Weld Qualification
- ✓ Custom, Proof Test
- ✓ Test Management

NDE:

- ✓ UT-Level III
- ✓ VT-Level III
- ✓ PT-Level III (Visible, Flourescent)
- ✓ MT-Level III (AC,DC)

About Applications Technologies Company

Applications Technologies Company (ATC) is the premier welding engineering enterprise in the US. Established to offer engineered welding and manufacturing solutions, our mission is to provide clients with the technical concepts and tools necessary to assist them in achieving and maintaining global competitiveness. Areas of expertise include: welding process selection and optimization; consumable selection; component design for manufacturability; weld quality planning and improvement; supply chain quality management; interpretation and application of welding standards; mechanical testing; nondestructive examination; and automated welding equipment design, fabrication and implementation. With more than fifty years of combined welding engineering and fabrication experience, ATC offers the most cost-effective approach to application of welding and manufacturing technology to maximize your company's bottom line.
